A Record, Without Context

> *Our credentials weren't obscure. The process around them was.*

The Origin of Verifee	
The Applicant:	Akshaya, applying to Georgia Tech's Executive MBA
The Credential:	An English-language degree from an accredited university in Singapore
The Friction:	Forced to pay ~$200 and wait ~1 week for a third-party interpretation
The Realization:	Credential interpretation isn't just an applicant hurdle—it's a massive systemic inefficiency.

Language: English

Status: Accredited

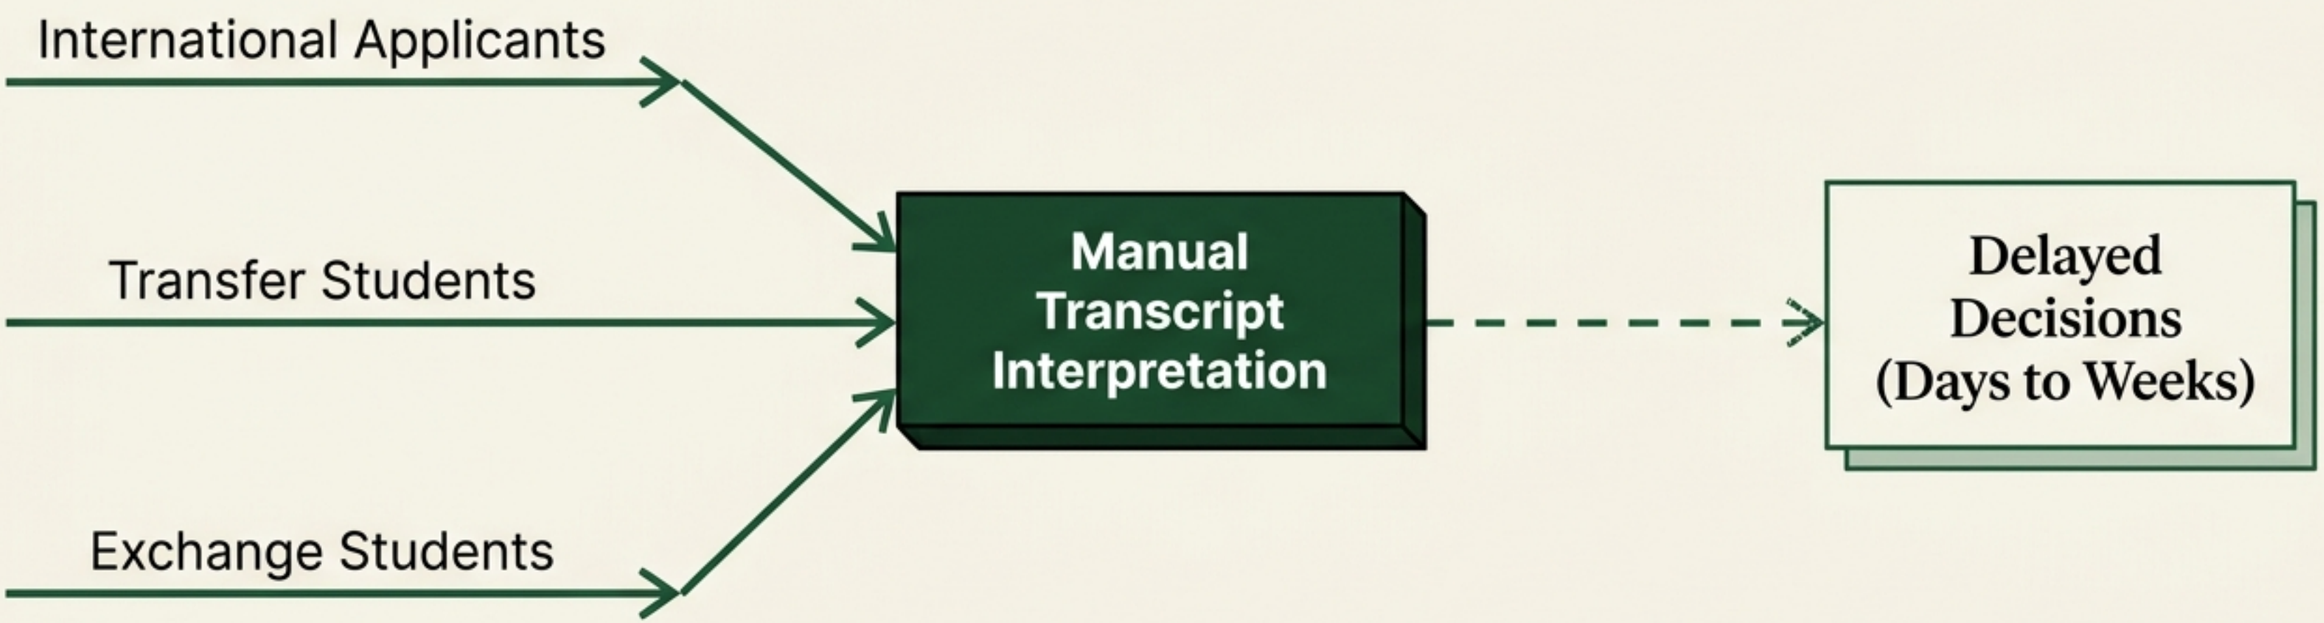

Cost: ~$200

Time: 7 Days

Gemini Notebook

The Admissions Bottleneck

The Problem: Manual processing disrupts academic mobility.
Processing academic transcripts across different education systems takes days to weeks.

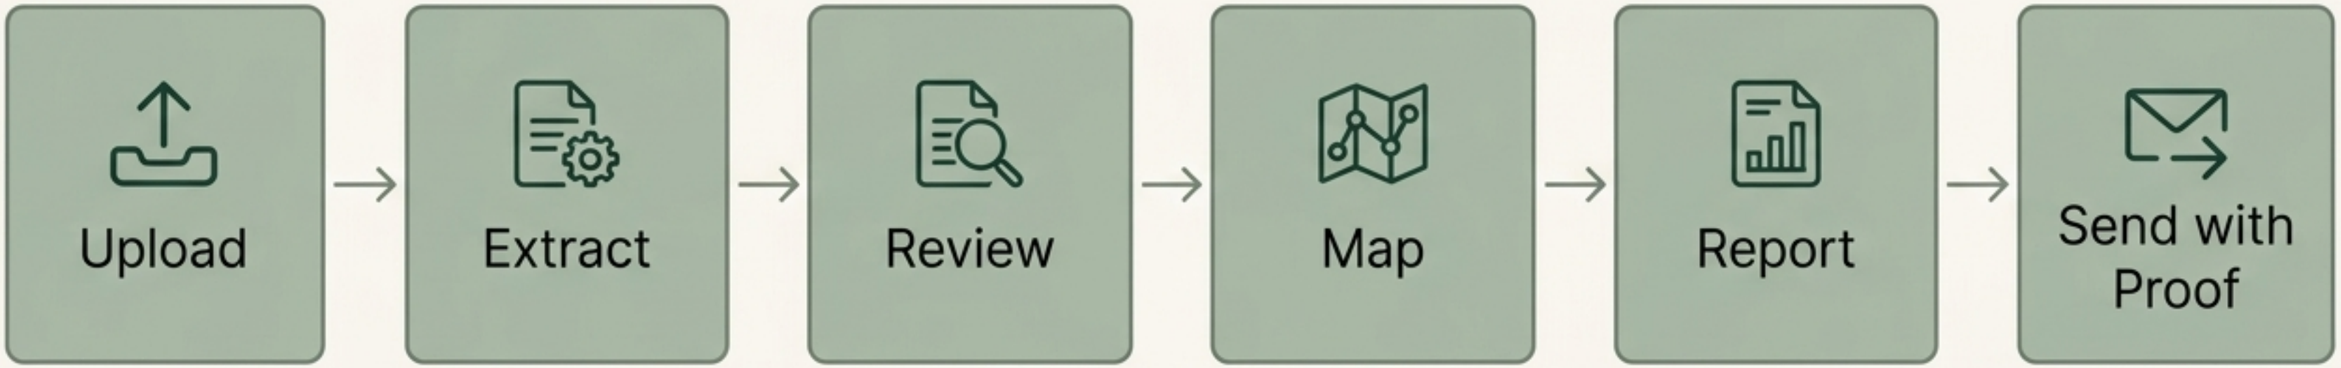

Gemini Notebook

Meet Verifee

Verifee

Verifee: AI-powered academic extraction and evidence-backed credential interpretation.

LIVE DEMO

Gemini Notebook

Under the Hood

Core Application	Extraction & Reasoning
Replit, Google Stitch	OpenAI, NLP, Custom Prompt Engineering
Context Retrieval	**Verification & Comms**
Intelligent Chunking	Solana (Immutable Proof), Email API Integrations

Operations & Current Beta Limitations:

- Optimized for low-cost maintenance and scalable cloud/API drivers.
- Beta constraint: Currently performs best when the source transcript contains at least some English, even if multiple languages are present.

Gemini Notebook

The Market Opportunity

A Massive, Recurring Workflow

Repeated credential interpretation is required across international, transfer, exchange, and graduate admissions.

The U.S. Market Context:

1.18M
International students in U.S. higher education (2024/25)

277K
New international enrollments in Fall 2024

500K+
International graduate students

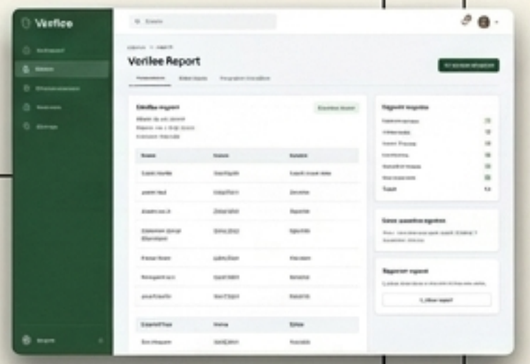

Future Growth: Tiered, volume-based pricing scales with institutional demand.

Traction & Next Steps

verifee.replit.app

Verifee is live in Beta.	
✓	12 Customer discovery interviews completed
✓	14 Active early testers
✓	Transcripts processed spanning 7 countries
✓	Early exploratory conversations with Georgia Tech Admissions

Our Ask for the Room:

We are seeking introductions to admissions stakeholders for:

1. Increased beta testing volume
2. Professional feedback on interpretation accuracy
3. Real-world validation of the admissions workflow
